CATALOG No. 12

THE constantly changing ideas and ideals of civilization find expression in the creative arts, prominent in which is architecture. These changes in major design naturally call for changes in decorative details. The thousands of ornaments illustrated in this book demonstrate the resourcefulness of Fischer & Jirouch artists and craftsmen in sensing the trend and anticipating the ornament requirements. Here you will find designs developed along the saner phases of modern art as well as new treatment of the classical, many of which are illustrated in our Catalog No. 8 and are still available.

Careful inspection of this book will divulge the wealth of material at your command for the ornamentation of modern buildings and at such nominal prices that it need not be slighted even in the most modest structures.

Frequent reference to these pages will prove to be an inspiration and a very definite economy in time. Suggestions for combining and grouping of various units will be gladly submitted by our designing department if you wish.

MATERIALS

The decorative ornaments illustrated in this catalog are made in various materials according to the purpose they are to serve and which in our judgment, backed by long experience, are the best and most suitable.

Fibrous Plaster—plaster of paris reinforced with hemp fibre.

Exterior and Interior Composition—a hard plaster composition which is handled with the same ease and facility as wood. All surfaces should be painted, and all joints puttied.

Cast Stone—a Portland cement composition, thoroughly weatherproof, available in tints to match the various stones, can be used in conjunction with cement stucco.

Metal-coating for cast stone is not an experiment with us as we have been furnishing ornamental Gardenware in this medium successfully for the past eight years.

Keene's cement—a hard and durable material for interior use, where it is subject to hard wear.

O'Kast—a medium in which all open grain woods can be accurately reproduced.

Caenstone—the pleasing color and texture of natural caenstone can be effectively reproduced in plaster, Portland or Keene's cement.

TERMS AND CONDITIONS

Prices subject to discount. Discount rates subject to regulation, see rate for current year. No order will be billed for less than \$1.00. Terms are 30 days net or 2% for cash. Firms not known to us will please send references and banking connections, or remit with order. Prices are f.o.b. Cleveland, Ohio.

OUR DISPLAY ROOMS

To enable visiting architects to visualize the complete harmony that is possible by proper selection of decorative ornament, we have developed a number of different rooms in various period treatment, each one authentic in design. To complete the effect, the rooms have been furnished with furniture typical of the period of the architecture.

The corridor leading into this unique display has domed mosaic ceilings supported by twisted columns. In niches along the sides of the corridor various styles of mantels are displayed and at the far end is a wall fountain of unusual design.

The O'Kast room with its paneled walls and carved beams, demonstrates the richly carved effect and the full deep toned color of beautiful wood grain.

The grilled windows, textured walls and Spanish mantel as well as the beamed ceiling, warmly colored tile floor and Spanish furniture give a very adequate idea of Spanish treatment.

The English room has a patterned ceiling with an English frieze and ornamental stone Tudor trim at the door and window. The walls are of "antique" plaster with occasional spots and an ornamental English mantel is set in.

The French room shows a ceiling treatment of center piece, ceiling bands and coved cornice, and a harmonizing wall treatment with decorative panels. An elaborate Scagliola mantel with an ornamental mirror above are typical of the French drawing room.

The large pool in the Garden with its sportive water figures, the fountains, bird baths and vases, demonstrate the possibilities for complete garden treatment, as well as modest settings.

The Patio, with its columns supporting arched niches harboring fern stands and fountains, suggests possibilities that are frequently overlooked.

In the Adam room, the decorative treatment of the paneled walls and the niches on both sides of the typical Adam mantel, is reflected in the ceiling with its center piece, ceiling band, corners and cornices.

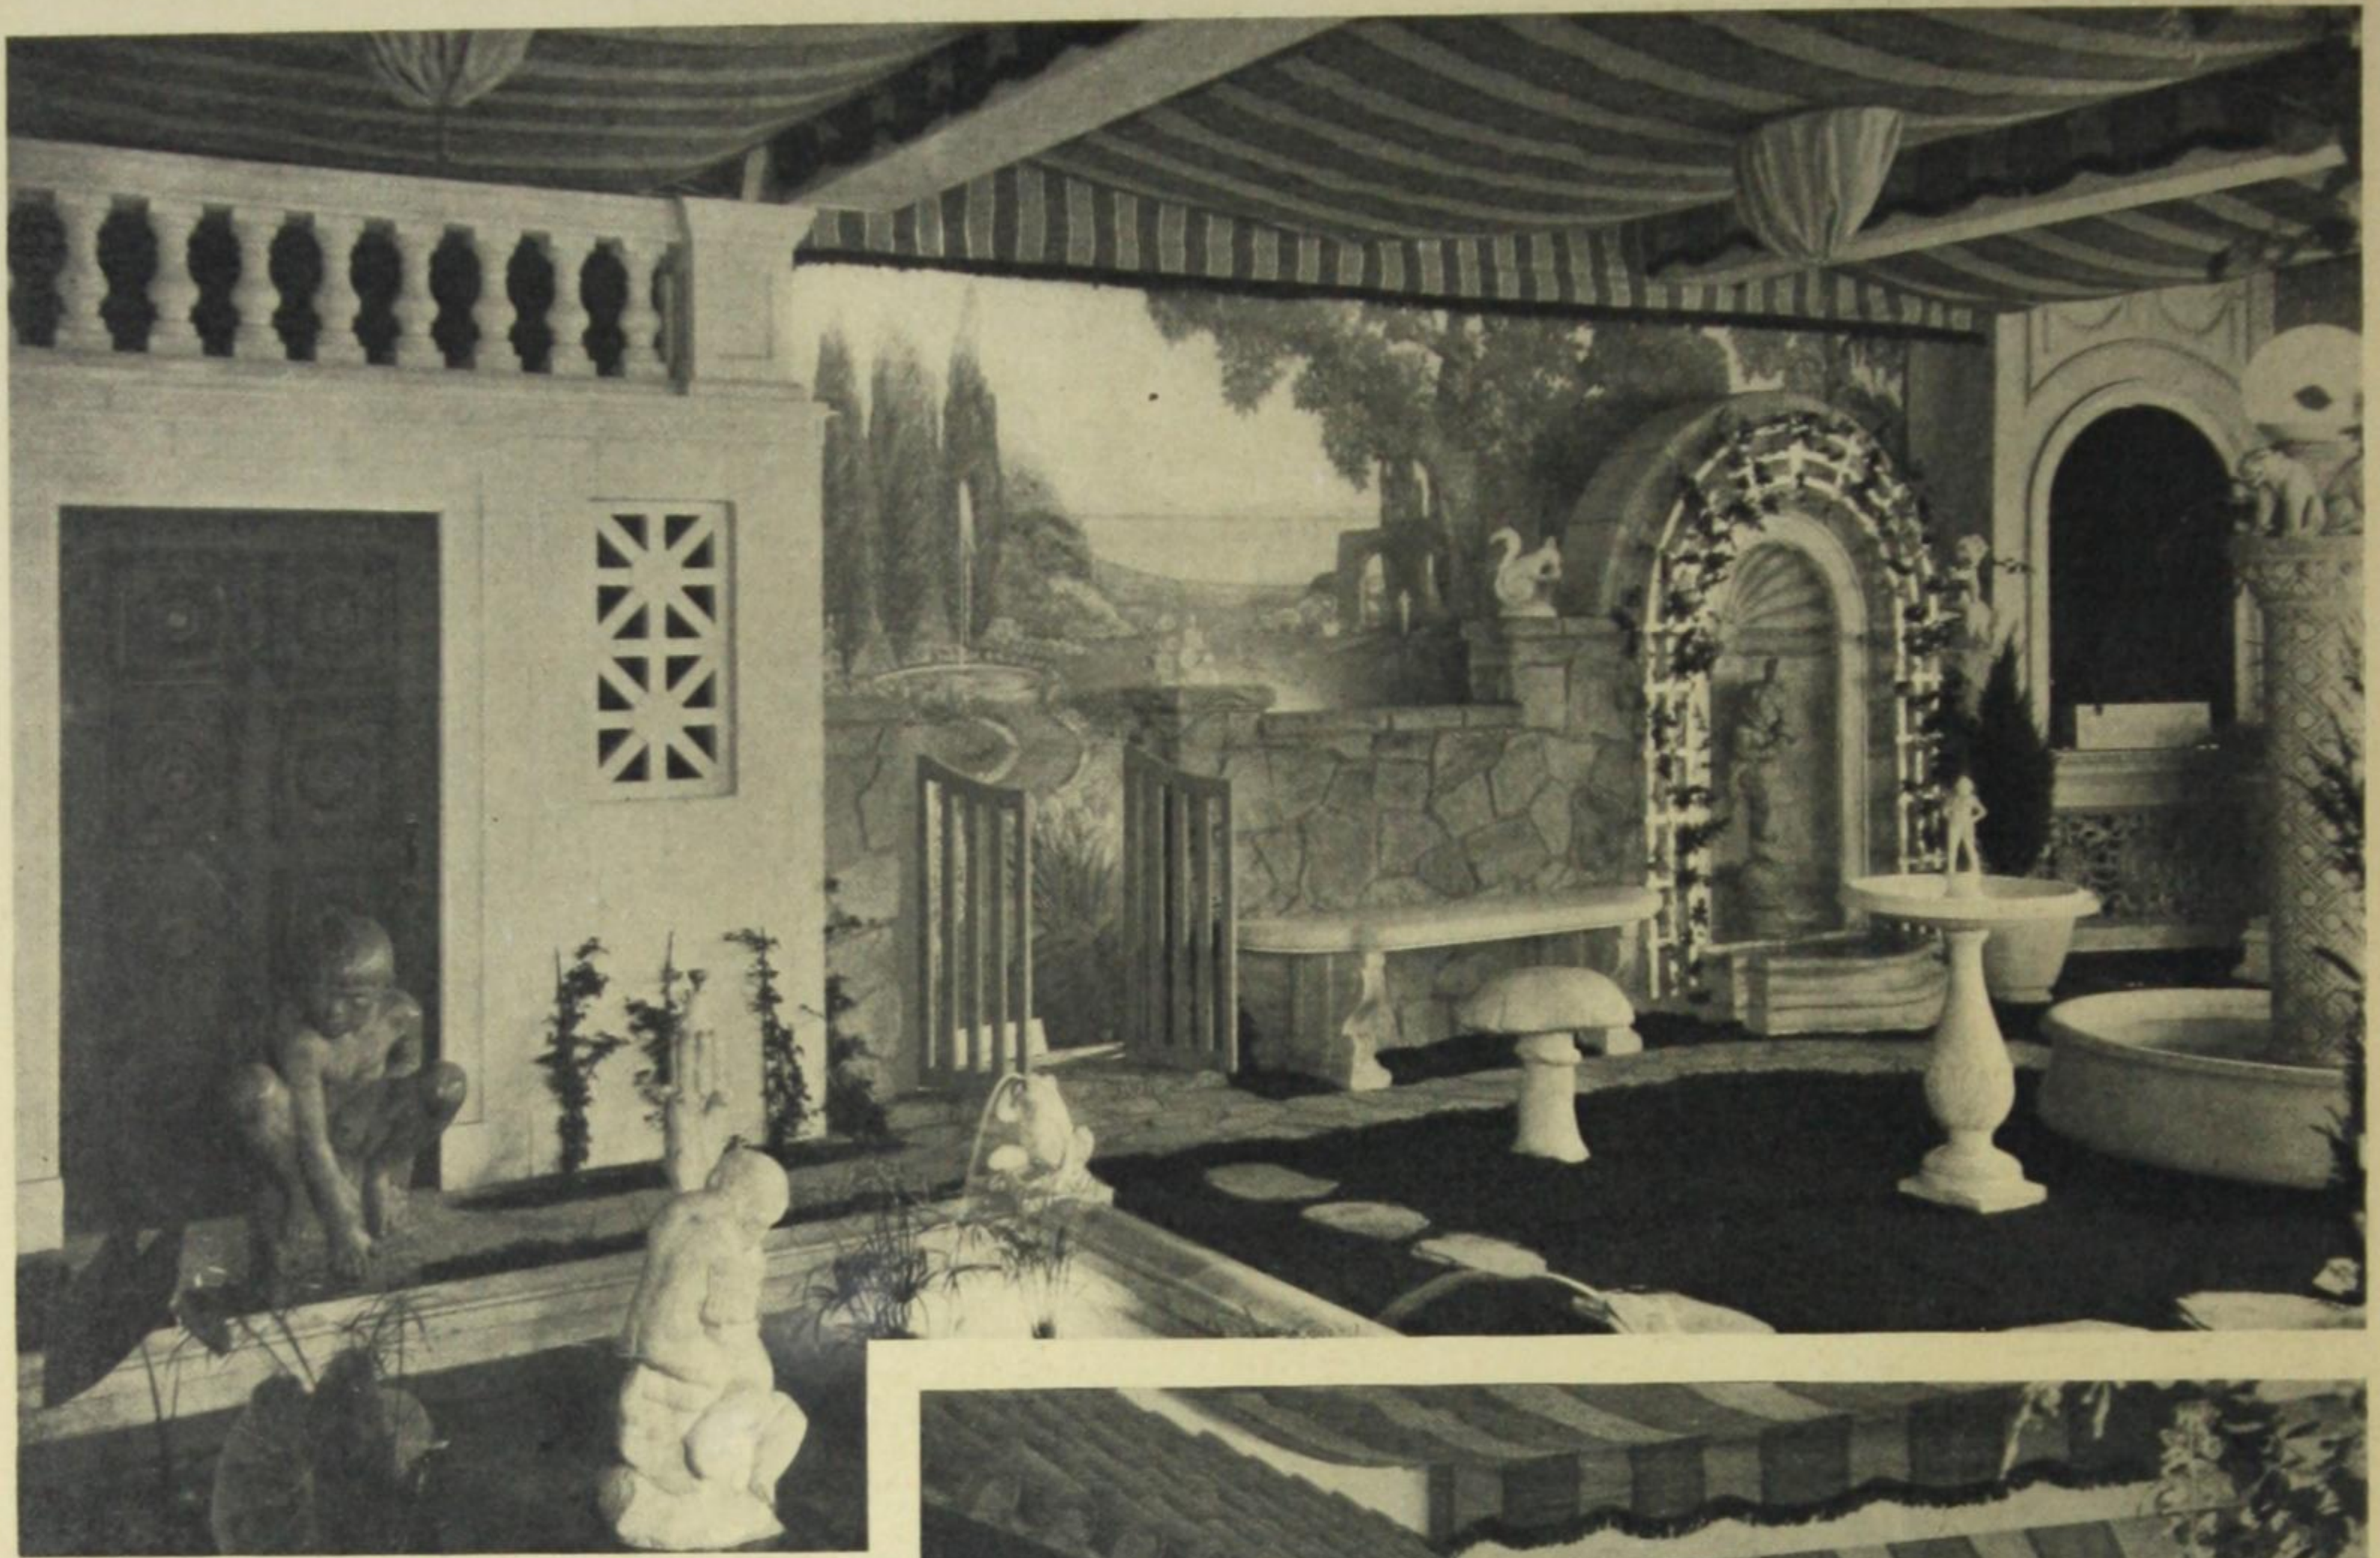

These rooms are available at all times without any charge or obligation to all architects, and we can not urge you too strongly to avail yourself of this unusual opportunity of having your reference work simplified by seeing many types of decorative ornament properly installed. You will be welcome at any time you wish to come.

THE SCALE MODEL

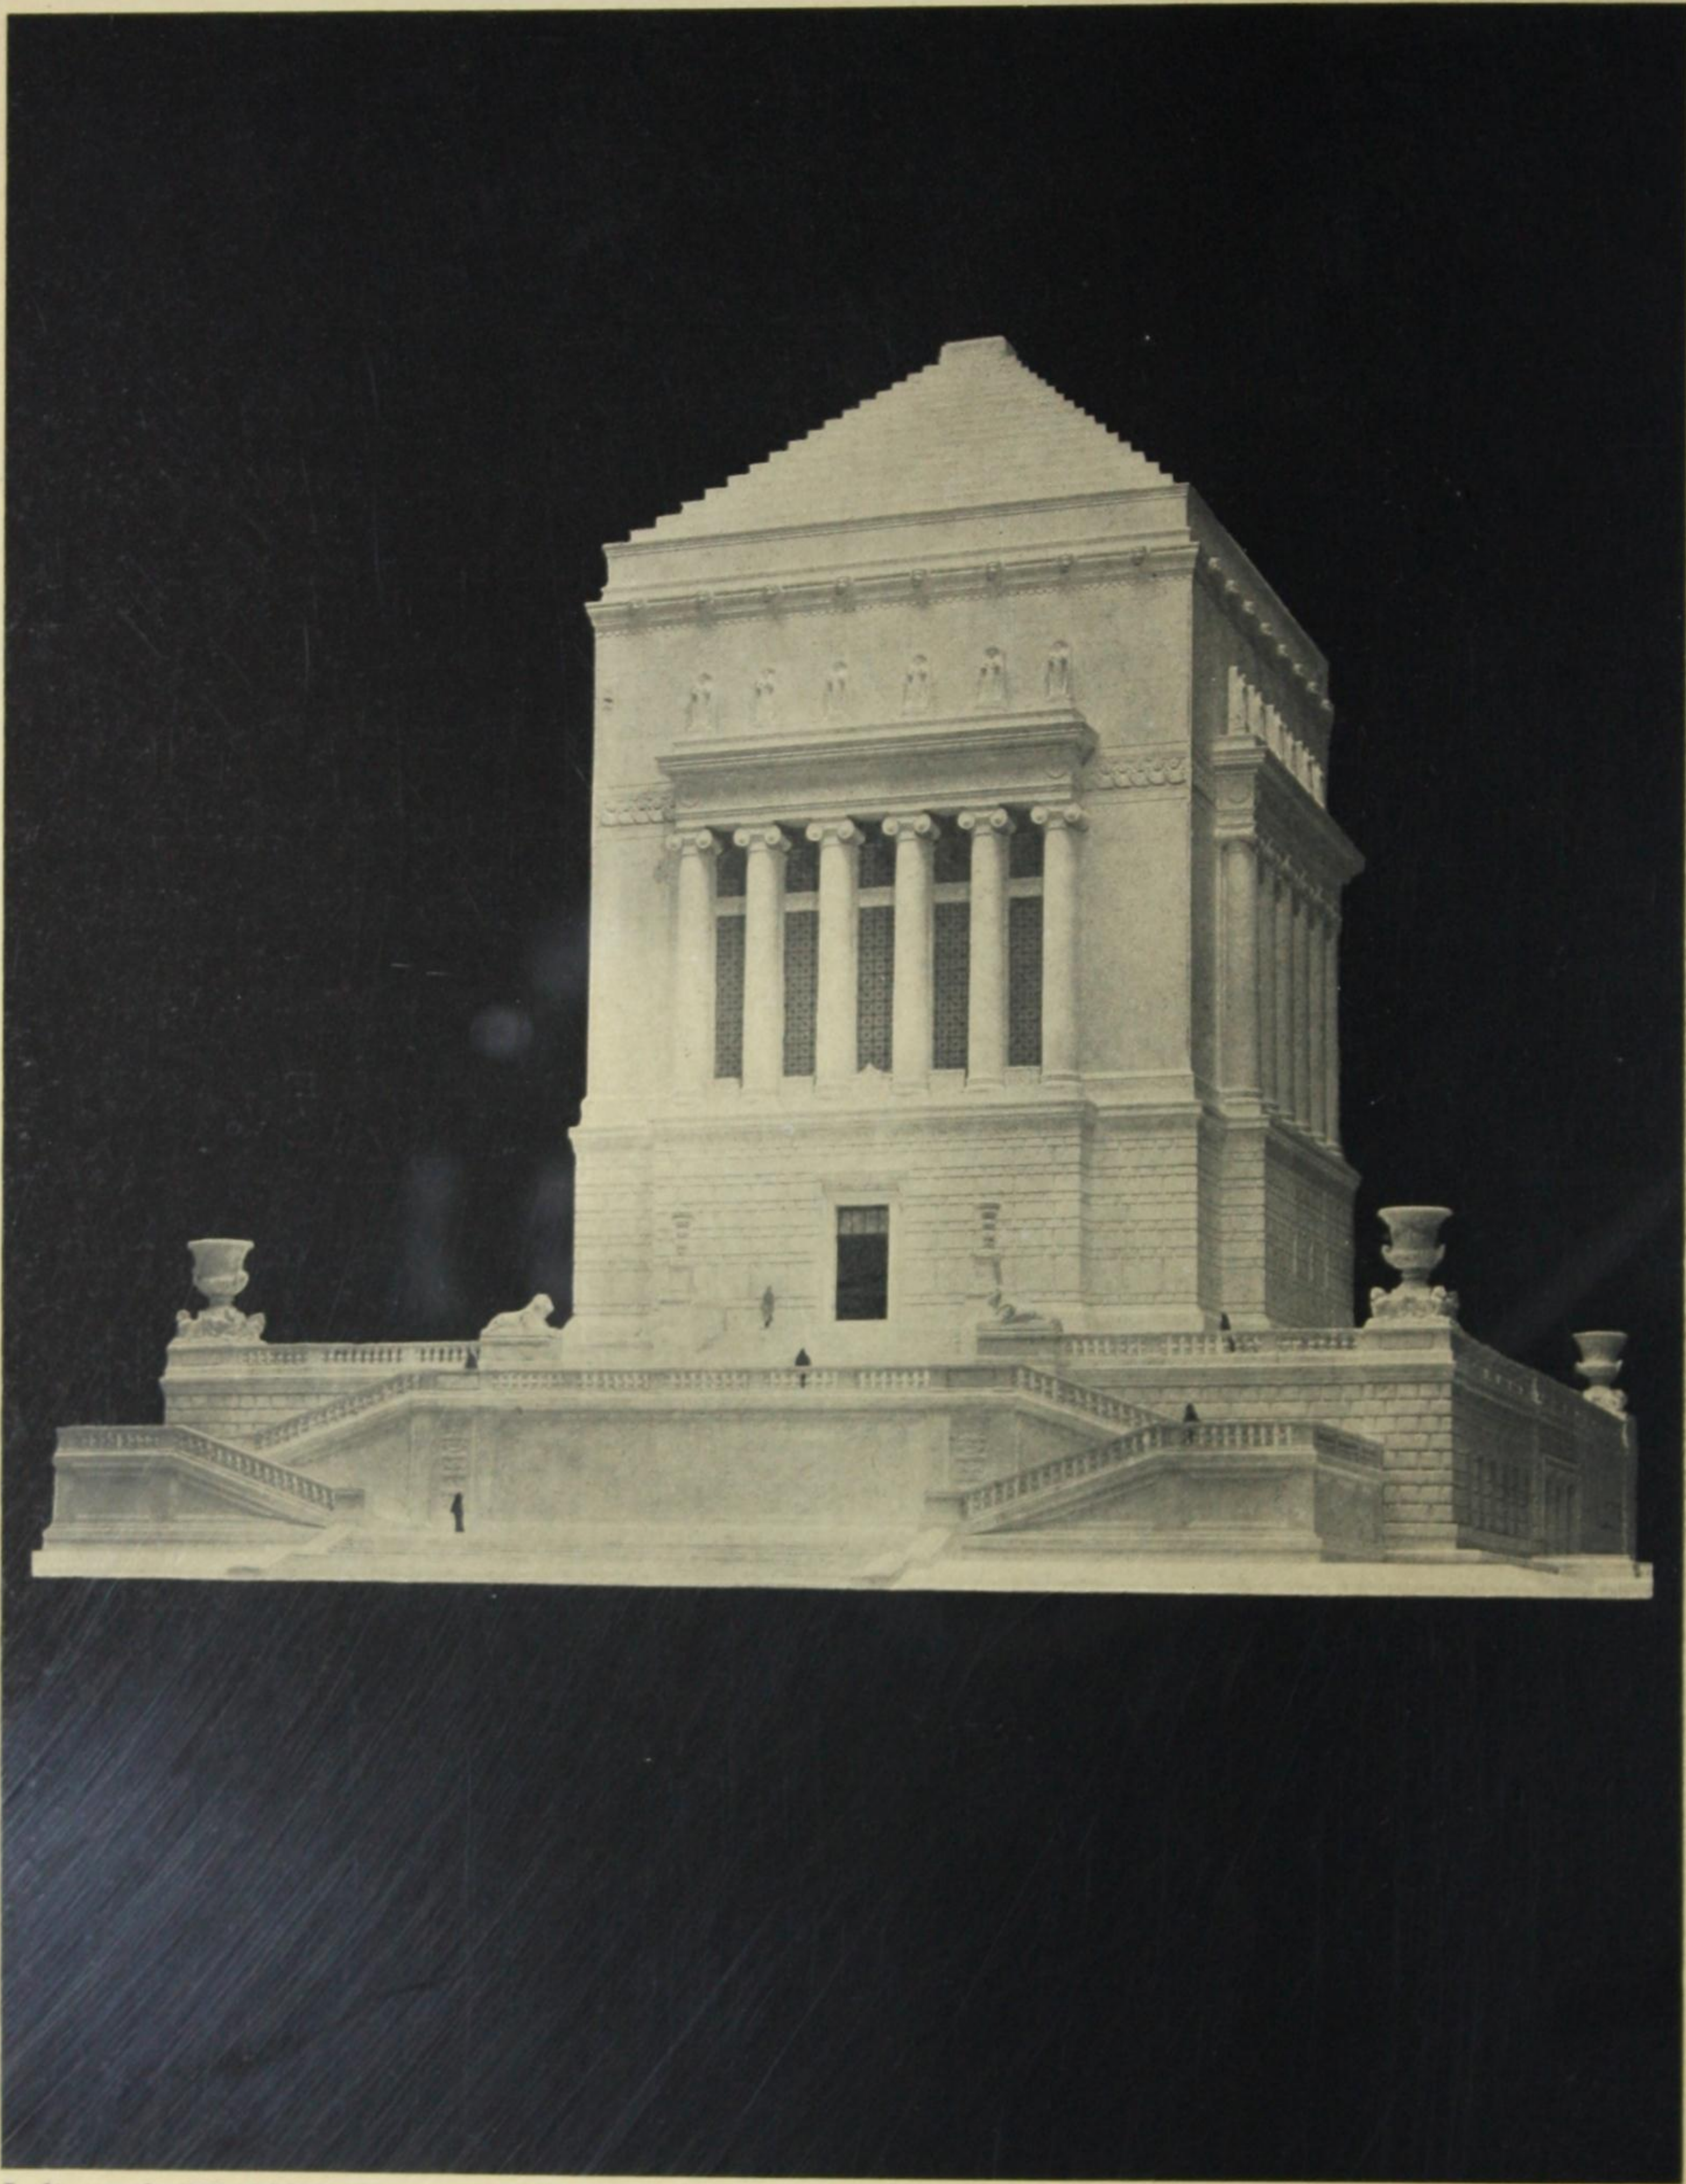

HE value of the scale model has been so definitely proven that it needs no further justification in the mind of the architect of today. Many instances of improvement in design, economy in floor space, and more suitable room arrangement, have definitely resulted from the study of scale models.

Decorative details developed in scale models enable the architect and owner to determine the suitability of the design before it is finally cut in stone or cast in bronze, or other expensive material, thus avoiding disappointment in the appearance of the finished work.

Our modeling staff is particularly well equipped to make scale models. Thirty years' experience in architectural work has given them a background of intimate knowledge of ornamental detail, and exceptional ability in interpreting rough sketches into pleasing and authentic details and motifs.

In the following pages we are illustrating just a few of the many models which have been produced in our modeling department, showing the broad scope of the requirements that these skilled craftsmen are called upon to execute.

Complete details and cost information will be furnished on request.

MODERN ORNAMENT

The development of the modern note in architectural design necessarily called for a corresponding modern treatment in ornamental detail.

Our interpretation of this tendency is illustrated in the following section with designs that adapt themselves admirably to modern architectural detail. This section is being augmented constantly with new models. Ask about them.

O'KAST

The charming effect of carved wood which adds so much dignity and richness and warmth to any interior and which is frequently omitted from specifications because of expense, can be included through the economy of O'Kast.

O'Kast is a reproduction of open grained woods and is so faithful that it serves its purpose exactly as well as carved wood itself. The panels are reproduced from patterns of actual carved wood and all of the characteristics of the various grains are so accurately reproduced that even experienced eyes are deceived.

O'Kast is a very hard and durable composition, and may be finished to match wood work.

Such effective decorative work can be achieved with O'Kast at such small expense that we urge you to take advantage of it frequently.
